

TST, A GLI COMPANY EXPANDS OPERATIONS, RELOCATES, SET TO HIRE MORE STAFF

VANCOUVER (October 19, 2010) – [Technical Systems Testing \(TST\), A GLI Company](#) is expanding its operations, and the expansion includes a new location and hiring of additional staff. The need for expansion is a direct result of increased demand that came about from TST's acquisition by [Gaming Laboratories International](#) earlier this year.

TST is now located at 6400 Roberts Street, Suite 210, Burnaby, British Columbia, Canada V5G 4C9. The new location is nearly double the size of TST's previous lab and enables the company to better serve clients today and allows for future expansion.

In addition to the new lab space, TST has recently added several more engineers and support staff. Currently, there are 15 employees in TST's Canadian lab, and that number is expected to quickly grow to at least 20 in the next few months.

TST CEO Salim L. Adatia said, "The demand for our services has been growing exponentially since the acquisition, and the increase in lab space and in the number of staff was absolutely vital to maintaining our very high standards of customer service. We expect the demand for our services grow in concert with the continuing worldwide expansion of regulated iGaming."

TST serves the iGaming industry in myriad ways including Internet, iTV and mobile device platform's Game testing, RNG certification, monthly game payout analysis and reporting, field data analysis, base website/user interface evaluation and full information systems security (ISS) audits.

TST is an internationally recognized testing facility offering a full range of testing and consulting services to the iGaming and land-based markets. Established in 1993, TST is one of the world's most experienced gaming test labs. Its facilities are globally positioned in Canada, China, England, Italy, The Netherlands and The Philippines to best meet regulator and supplier needs. Each lab works closely with industry operators, software suppliers and jurisdictional regulators to verify compliance with stringent regulatory requirements, supplier technical specifications, and world best practice industry standards. TST's superior customer service, proprietary methodologies and ISO/IEC 17025 accredited quality systems assure its clients a premium, value added service.
