TST EXPANDS ASIAN OPERATIONS THROUGH NEW MACAU BASED LAB

VANCOUVER – On the heels of the recent opening of their new testing Laboratory in London, United Kingdom, Technical Systems Testing (TST) is proud to announce the opening of its newest testing Laboratory in Macau, Asia on 1st June, 2008. Anna Sainsbury, TST's international Marketing & Client Support Manager noted that TST's announcement was "*Exceptionally well received, and receptiveness was overwhelming, when mentioned to clients and regulators at the recent G2E Asia conference*".

This decision for such rapid, additional expansion in Asia further proves TST's commitment to playing an active role in the global gaming market. The new location in Macau will allow TST to keep abreast with the potential modifications and updates to gaming technical standards in Macau as well as other surrounding emerging Asian jurisdictions. TST's Chief Executive, Salim L. Adatia stated, "*The strategic location of TST's new Macau laboratory displays our on-going commitment to providing high quality testing and consultation services on behalf of the Macau Gaming Inspection and Coordination Bureau (DICJ). It also enhances the speed at which TST can respond to the testing needs of long-standing Asian's gaming operators and manufacturers whom we service*".

The aforementioned has already been clearly demonstrated at TST's new London office, where the laboratory's success and demand with local clients is ever increasing. TST's Chief Technical Officer, Noah Turner added "*The demand for a greater presence in Asia has been upon TST in recent years, marking the opening of the new Macau office as a major milestone for the TST group of companies worldwide. Satisfying this demand will in turn ultimately benefit both the local gaming market and our clients internationally as TST provides them with options for more Transfers of Approval (TOA)'s between jurisdictions*".

As one the world's most experienced test facilities for both the land-based and remote (interactive) gaming industry, TST sees a continuing demand for the highest integrity in testing and client support balanced with business efficacy. With over 15 years experience and worldwide recognition TST also maintains established offices in Vancouver (Canada), Sydney and Melbourne (Australia) and London (United Kingdom).
